

GPT image decisions in real 3D CalculiX AMR

- Best of 3 Doerfler (ex post)
- Analytic density
- GPT direct image decision
- GPT + spatial WM

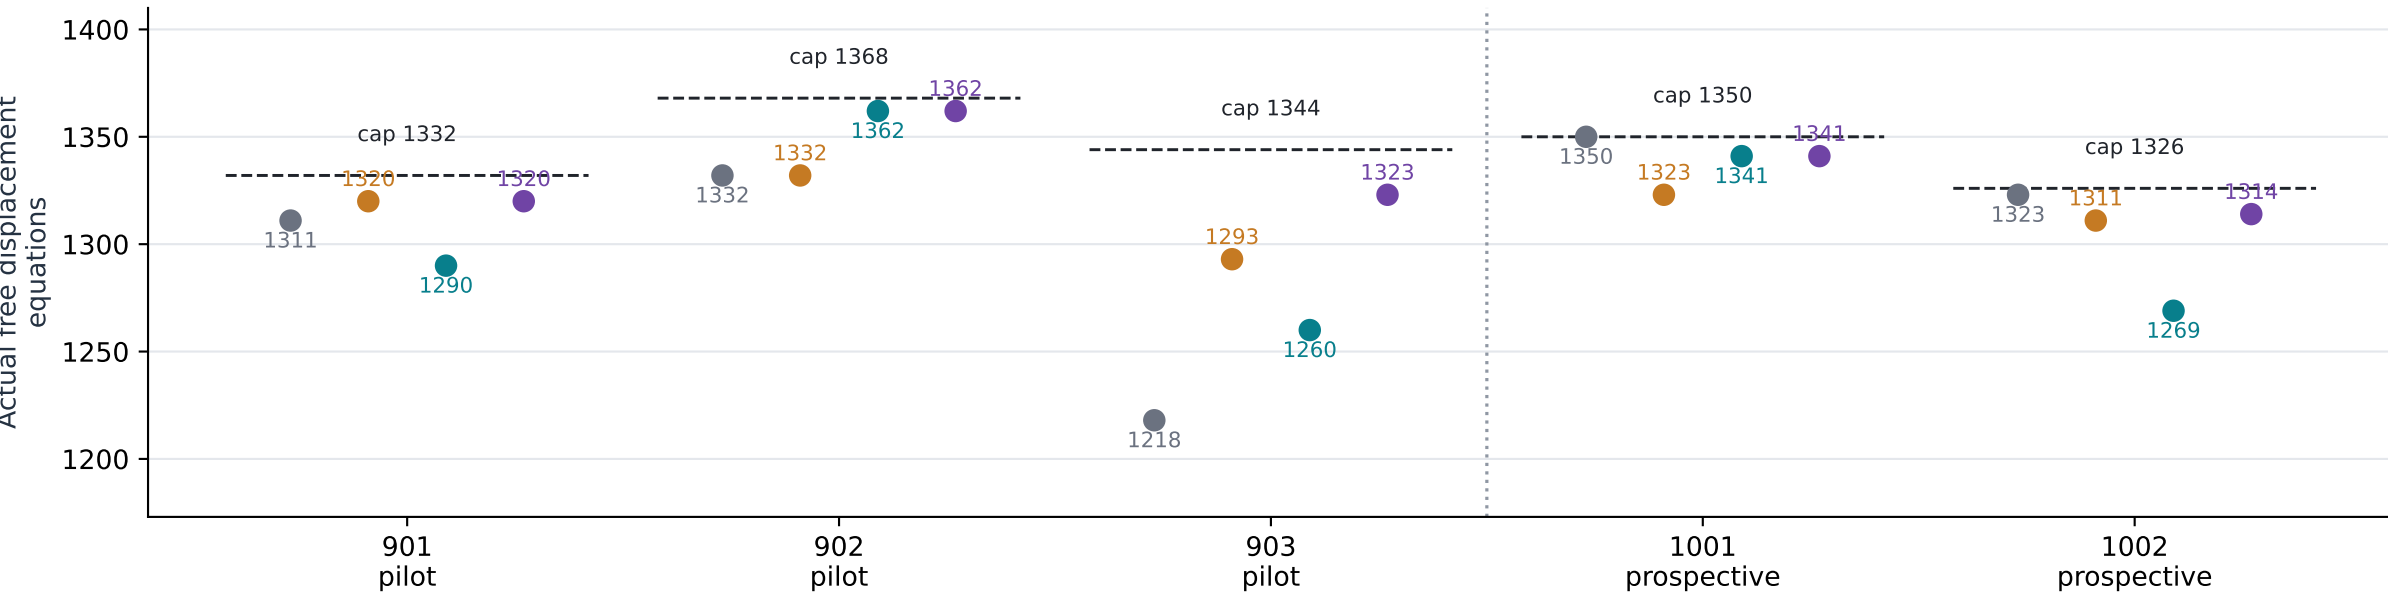

A Accuracy against the same finite reference

B Relative outcome; all comparisons are case specific

C Resource use; dashed lines show the common cap

Common finite reference: background h0/4; convergence is not established. Equal caps, unequal actual equations.
The added ranker matches the existing WM choices on both prospective cases; no separate prospective ranker gain is shown.
